

MAKE HEALTH CARE ★ WORK FOR ★ *All* OF US

For too long, health corporations like hospitals, insurance companies and prescription drug manufacturers have boosted profits by price-gouging patients on their coverage and care. Despite some progress on lowering drug prices, expanding coverage and protecting consumers, too many Americans still face soaring premiums, sky high out of pocket costs, endless phone calls and forms to fill out, as well as delays, denials and long waits or drives to get care. Millions can't get the care they need when they need it.
